Polish students were asked by Italian ones the following question:

Dear Polish students, can you tell us a little about the situation you are living with your Ukrainian friends? A Ukrainian student came to our school, but in our class...

While staying in Batea, Spain (a project on Robotics and languages) our eTwinning project members sat around one table and Nadia wrote an answer for you:

Meeting Ukrainian kids, who are in our age is interesting experience. We became friends with them and I think it's amazing that we can talk with them and support them as much as it's possible. They are normal people who have to find themselves in new places, and we have to help them.

At first it was weird to talk with them, for example with using Google translator. But they are learning Polish very fast (our languages sound similar) and become natural. We hope the war will end soon and our friends will be able to go back to their homes safely.
